欢迎莅临毅兴行展台17. E111

## The 34th International Exhibition on Plastics & Rubber Industries CHINAPLAS 2021

The plastics industry expect for two-year International Chinaplas. After several winds and rains, with sufficient preparations, the exhibition is expected to be held on April 13-16, 2021.

We remember that the International Rubber and Plastics Exhibition was held in Guangzhou in 2019, and the next one should be held in Shanghai as planned. However, the New Crown Epidemic is severe and the country has adopted prudent measures. The organizer has also decisively extended the exhibition to 2021, which is also a reasonable arrangement.

In 2021, it moved to the Shenzhen International Convention and Exhibition Center. It is located at the top of the Guangdong - Hong Kong - Macao Greater Bay Area. It is the intersection of the Guangzhou - Shenzhen - Hong Kong core development corridor and the east-west development corridor. We believe it will attract many people in the industry to come and visit.

The exhibition hall is arranged in a long "fishbone style". There are 19 exhibition halls arranged symmetrically from east to west along the central corridor. The air flows smoothly, which is estimated to reduce the chance of infection.

**The exhibition areas for Plastic Raw Materials** are distributed in Exhibition Halls No. 17, No. 16, No. 15 and No. 13, and there are 8 exhibition types including:

1. Additive Zone
2. Bioplastics Zone
3. Chemical and raw materials zone
4. Special area for pigments and master-batch
5. Composite and special materials zone
6. Recycled Plastic Zone
7. Semi-finished products area
8. Thermoplastic elastomer and rubber zone

The booth of **Ngai Hing Hong** is located at No. E111, Hall 17 of the Chemicals and Raw Materials Zone. We look forward to the guidance of various manufacturers/visitors.
